## Stock Trading Note - For Professional Adviser Use

June 2010

### **Action: BUY: Soc Gen 6 YR FTSE Compass**

This Societe Generale 6 year structured product was launched on 28 April 2010, when the strike level of the FTSE 100 was 5586. The product has a 24 month look back feature observed monthly. Investors lock in a 1:1 positive participation on the down side to the lowest point during the 24 month period, after which they are long the market from this point.

For example, let's say the lowest point is 30% less than the strike during the initial 2 years, and the FTSE 100 ends up 40% above the strike level at maturity. Investors will receive 30% to the low point, 30% back to the strike and a further 40% for the index rise, equating to a gain of 100%. Please note this is an example for illustrative purposes and not a prediction of what may happen.

This product was purchased due to our concern that markets would correct. It was purchased for clients' underweight UK equities.
